Z-RADAR

Remote Assessment Documentation And Reimbursement

**Finding qualified professionals to manage the MDS department
has never been more challenging and important!**

Zimmet Healthcare's Z-RADAR is a fully scalable remote MDS solution for Skilled Nursing Facilities. We provide interventional assessment management designed to cover short-term absences and permanent outsourced services that often prove more cost effective than in-house models.

WHY Z-RADAR?

- Avoid technology-fatigue & application expenses: Z-RADAR incorporates proprietary technology that improves MDS accuracy and efficiency.
- Maintain compliance: SNF regulations evolve quickly and require full-time attention to prevent fines & liabilities.
- Reconcile conflicting payment models: ZHSG's unrivaled expertise in federal & multi-state fee-for-service and managed reimbursement systems ensures optimal revenue and risk mitigation.
- Prepare for workload variation: Census fluctuations can impact MDS department productivity and threaten reimbursement-compliance.
- Sleep well at night! Consistent and dependable MDS coverage is a luxury few operators enjoy. Unexpected staff absences threaten assessment-integrity and siphon corporate resources from other essential departments. Z-RADAR protects the SNF revenue cycle even during staffing emergencies.

Zimmet Healthcare has over 25 years of SNF reimbursement-compliance experience. Z-RADAR draws on our multidisciplinary expertise to deliver a balanced, comprehensive program that ensures appropriate reimbursement, regulatory compliance, and workflow efficiency, while also supporting quality reporting. Our mission is to relieve our clients of burdensome administrative challenges so they can focus on care delivery and enhancing the patient experience.

Clients are assigned a dedicated MDS team that works directly with facility staff to gather resident information, implement & execute triple-check processes and monitor key reimbursement & quality metrics. Your MDS liaison virtually attends utilization review meetings and integrates our partner technology applications. This comprehensive program provides the sophistication and analytics needed to overcome the challenges of operating in a post-pandemic world.

Z-RADAR CLIENTS ENJOY AN ARRAY OF VALUE-ADDED SERVICES THAT MAY BE BUNDLED FOR MAXIMUM OPERATING EFFICIENCY:

- MDS assessment scheduling, completion & submission
- Advanced reimbursement & quality reporting analytics
- PDPM & Medicaid CMI management
- CMS Five-Star support
- Survey preparation/guidance
- Full-time regulatory support
- Audit defense / ADR response management

Z-RADAR IS ENTIRELY SCALABLE AND MAY BE ADJUSTED AT ANY TIME:

- Temporary coverage (short-term illness, family leave, staffing shortages)
- Transitional support / Change of ownership
- Full MDS department outsourcing (minimal facility resources required)
- Multi-facility “floating” MDS coverage & oversight
