## MEMORANDUM

**TO:** RHCF Members

**FROM:** Dan Heim, Executive Vice President  
Darius Kirstein, Director of Financial Policy & Analysis

**DATE:** August 29, 2016

**SUBJECT:** Medicare SNF PPS Final Rule for FY 2017

**ROUTE TO:** Administrator, Department Heads, Business Office

---

### Introduction

The Centers for Medicare and Medicaid Services (CMS) has released the skilled nursing facility (SNF) prospective payment system (PPS) [final rule for federal fiscal year \(FY\) 2017](#). The rule includes updates to SNF Medicare Part A rates and the SNF Value-Based Purchasing (VBP) and Quality Reporting Program (QRP). Rates established by the final rule go into effect for cost reporting periods beginning on or after Oct. 1, 2016. CMS has also issued a [fact sheet](#) on the final rule.

Included with this memo, LeadingAge NY is providing members with:

- Brief summaries of changes being made to the SNF VBP and QR Programs;
- A summary of the factors impacting the SNF PPS rates and related programmatic issues;
- Directions on using the LeadingAge national SNF PPS rate tool;
- An update on changes to the wage index; and
- Listings of 2016 SNF PPS rates by New York State region, including the enhanced AIDS/HIV rates (i.e., 128 percent of the base rates).

### SNF Value-Based Purchasing Program

The Protecting Access to Medicare Act of 2014 (PAMA) requires that VBP apply to SNF payments beginning in October 2018. The VBP will be funded with a two percent withhold to SNF Part A payments that can be partially earned back based on each facility's re-hospitalization rate and level of improvement.

CMS specified the initial hospitalization measure that would be the basis of SNF VBP in last year's SNF PPS Final Rule. In that rule CMS adopted the SNF 30-Day All-Cause Readmission Measure, (SNFRM) (National Quality Forum/NQF #2510), as the all-cause, all-condition readmission measure that will be used in the first stages of the SNF VBP Program. This measure estimates the risk-standardized rate of all-cause, unplanned, hospital readmissions for SNF Medicare beneficiaries within 30 days of their prior proximal short-stay acute hospital discharge. SNFRM is a claims-based measure, requiring no additional data collection or submission burden for SNFs. Links to the SNFRM technical specifications are available on the [CMS Nursing Home Quality Initiative webpage](#).

In addition to the mandate that CMS apply a VBP component to SNF reimbursement in 2018, legislation requires CMS to refine the hospitalization measure as soon as practicable. In this year's final rule, CMS specifies a SNF 30-day Potentially Preventable Readmission (SNFPPR) measure as the refined hospitalization measure. While the SNF VBP program will begin by utilizing the all-cause readmission measure, it will transition to the SNFPPR measure at an unspecified "as soon as practicable" timeframe. Measure specifications and technical reports on both the SNFRM and SNFPPR are available [here](#).

- For the purposes of the SNFPPR measure, the definition of potentially preventable readmissions differs based on whether the resident is residing in the SNF (referred to as "within-stay") or is in the post-SNF discharge period; however, there is considerable overlap of the definitions. For patients readmitted to a hospital during the SNF stay, CMS believes that potentially preventable readmissions (PPRs) should be avoidable with sufficient medical monitoring and appropriate treatment. The within-stay list of PPR conditions includes the following, which are categorized by 4 clinical rationale groupings: (1) Inadequate management of chronic conditions; (2) Inadequate management of infections; (3) Inadequate management of other unplanned events; and (4) Inadequate injury prevention.
- For individuals in the post-SNF discharge period, a PPR refers to a readmission in which the probability of occurrence could be minimized with appropriate post-discharge instructions, including follow-up ambulatory care. The list of PPR conditions in the post-SNF discharge period includes the following, categorized by 3 clinical rationale groupings: (1) Inadequate management of chronic conditions; (2) Inadequate management of infections; and (3) Inadequate management of other unplanned events. The inadequate injury prevention criterion applied to patients who are in-stay is not included for the post-SNF discharge period.

The primary difference between the SNFRM and the SNFPPR is that the former focuses on all-cause unplanned readmissions, while the new one focuses on readmissions of existing SNF patients that are potentially preventable (i.e., "avoidable with sufficient medical monitoring and appropriate treatment"). For individuals discharged from a SNF but still within the 30-day window, "preventable" is when "the probability of occurrence could be minimized with adequately planned, explained and implemented post-discharge instructions including the establishment of appropriate follow-up ambulatory care." Both measures use the same statistical approach, target the 30-day window after hospital discharge, and utilize a similar set of patient characteristics for risk adjustment. Both will be calculated using a full year's worth of data and be calculated using claims data, thus requiring no additional data submission.

In the final rule, CMS details the scoring methodology, which will consider performance and improvement and use 2015 Calendar Year (CY) claims as the baseline period for calculating performance standards for the FFY 2019 SNF VBP. CY 2017 will be the measured performance period for the FFY 2019 SNF VBP. The final rule also establishes performance standards and confidential feedback reports to SNFs. CMS background information on SNF VBP is available [here](#).

## SNF Quality Reporting Program

To meet the requirements enacted in the Improving Medicare Post-Acute Care Transformation (IMPACT) Act of 2014, CMS previously finalized three measures to include in the SNF Quality Reporting Program: (1) skin integrity and changes in skin integrity; (2) incidence of major falls; and (3) functional status, cognitive function, and changes in function and cognitive function. The IMPACT Act requires the submission of standardized data by SNFs, long-term care hospitals, home health agencies and inpatient rehabilitation facilities.

In the 2017 SNF PPS final rule, the agency further defines reporting requirements, sets out review and correction timeframes, and proposes four additional measures (the top three to be used in FFY 2018 QRP, and the final one, Drug Regimen Review, to be used in 2020):

- Discharge to Community: This measure assesses successful discharge to the community from a SNF setting, with successful discharge to the community including no unplanned re-hospitalizations and no death in the 31 days following discharge from the SNF.
- Medicare Spending Per Beneficiary: This SNF measure holds SNF providers accountable for the Medicare payments within an “episode of care”, which includes the period during which a patient is directly under the SNF’s care, as well as a defined period after the end of the SNF treatment, which may be reflective of and influenced by the services furnished by the SNF.
- Potentially Preventable Readmission: This measure assesses the facility-level, risk-standardized rate of unplanned, potentially preventable hospital readmissions for Medicare fee-for-service beneficiaries in the 30 days post-SNF discharge. Please note that this measure is similar, but not identical, to the SNFPPR measure discussed above under the VBP program.
- Drug Regimen Review: This proposed measure assesses whether SNFs and other post-acute care providers were responsive to potential or actual clinically significant medication issue(s) when such issues were identified.

Beginning in payment year 2018, SNFs that fail to submit data required by the QRP will face a two percentage point reduction in their annual rate update. Policies and procedures associated with public reporting are also being finalized, including the reporting timelines, preview period, review and correction of assessment-based and claims-based quality measure data, and providing confidential feedback reports to SNFs.

QRP background is available [here](#).

## Factors Impacting the Final Rates

In its final rule, CMS makes some updates and corrections to the rate and wage index calculations that result in a net increase to the figures presented in the [proposed rule](#). With the additional refinements, CMS projects that aggregate payments in FY 2017 under the SNF PPS will increase by \$920 million, or 2.4 percent, as compared to FY 2016.

The formula for the estimated increase starts with a 2.7 percent Market Basket Increase (MBI) and reduces it by 0.3 percentage points to reflect the mandated Multifactor Productivity Adjustment (MPA) for a net 2.4 percent increase. The SNF MBI reflects changes over time in the prices of an appropriate mix of goods and services included in the SNF market basket. The unadjusted 2.7 percent increase is based on the IHS Global Insight, Inc. (IGI) second quarter 2016 forecast of the FY 2010-based SNF market basket with historical data through the first quarter of 2016.

A Market Basket Forecast Error Adjustment (MBFE), a mechanism to reconcile the projected to the actual MBI from two years' prior, is not applied because the difference between projected and actual 2015 increase is less than the established threshold where an adjustment is required.

For purposes of the MBFE calculation for FY 2015 (the most recently available FY for which there is final data), the estimated increase in the market basket index was 2.5 percentage points, while the actual increase for FY 2015 was 2.3 percentage points, resulting in the actual increase being 0.2 percentage point lower than the estimated increase. Accordingly, as the difference between the estimated and actual amount of change in the market basket index does not exceed the 0.5 percentage point threshold, the FY 2017 market basket percentage will be not adjusted to account for the 2015 forecast error. Table 2 shows the forecasted and actual market basket amounts for FY 2015.

**Table 2. Calculation of MBFE Based on FY 2015 Data.**

Actual MBI Increase	Projected Increase	Difference between Projected & Actual
2.3 %	2.5 %	(0.2)
0.2 < 0.5 threshold therefore no MBFE for is applied to the FY 2017 rate		

With the net 2.4 percent increase, overall Medicare Part A payments are set to increase. However, providers should note and budget for the ongoing impact of “sequestration.” Medicare provider payments were cut by 2 percent beginning April 1, 2013 as part of the spending reductions required by the Budget Control Act of 2011 (i.e., sequestration). This means that while the schedule of payment rates is not directly impacted, overall Medicare payments to providers will continue to be reduced by 2 percent through 2023.

Finally, data used to calculate the wage index, based on hospital wage data, was updated to reflect the period of FY 2013 (see below for additional information on the wage index).

## LeadingAge Rate Tool

As always, [LeadingAge](#) is providing members with their SNF PPS Rate Calculator. This is an Excel™ spreadsheet that provides the Medicare Part A rates by county, and is available with member log-in by [clicking here](#). The spreadsheet allows members to insert their estimated Medicare days per Minimum Data Set (MDS) Resource Utilization Group (RUG IV) category and project Medicare revenue and also provides the rate adjustments under sequestration. (Please note that the 2017 coinsurance amounts are not yet available so the calculator shows 2016 amounts). If any member has difficulty accessing the tool, please contact Darius Kirstein at LeadingAge NY for assistance at [dkirstein@leadingageny.org](mailto:dkirstein@leadingageny.org) or call 518-867-8841.

Please note the following instructions from LeadingAge:

**To Start:**

- *Users need to start by opening either the urban or rural page and using the click-down menu to search by county.*
- *Note that there may be multiple counties in different states with the same name. The calculator is arranged in alphabetical order by county and then by state. Start with the county name and then follow the county list to find your respective state.*
- *Counties will appear on either the rural or urban page – no county is duplicated across the two lists and if it doesn't appear on one, it will be on the other.*

Please note that the wage index values have been updated from the proposed to the final rule and wage index.

## Programmatic Issues

Along with addressing Medicare Part A rates, SNF VBP and SNF QRP, the SNF PPS final rule addresses two other programmatic issues.

- ***Administrative Presumption (no change in final rule)***

CMS continues the administrative presumption of coverage for individuals scoring in one of the upper 52 RUG IV (out of 66) categories on the initial 5-day and subsequent Medicare required assessments. The presumption automatically classifies these individuals as meeting the skilled level of care needed for Medicare Part A coverage if they are categorized in the following RUG-IV categories: (1) Rehabilitation plus Extensive Services; (2) Ultra High Rehabilitation; (3) Very High Rehabilitation; (4) High Rehabilitation; (5) Medium Rehabilitation; (6) Low Rehabilitation; (7) Extensive Services; (8) Special Care High; (9) Special Care Low; and (10) Clinically Complex.

In the rules CMS notes that this administrative presumption policy does not supersede the SNF's responsibility to ensure that its decisions relating to level of care are appropriate and timely, including a review to confirm that the services prompting the beneficiary's assignment to one of the upper 52 RUG-IV groups (which, in turn, serves to trigger the administrative presumption) are themselves medically necessary.

An individual scoring in one of the lower 14 RUG IV categories is not automatically assumed to meet the skilled level of care and must be evaluated on an individual basis in order to trigger Part A coverage.

- ***Consolidated Billing (no change in final rule)***

Under [consolidated billing](#), the SNF is financially responsible for covering all services provided to the Medicare beneficiary in a Part A stay, unless the service is specifically excluded from consolidated billing. In general, [the following services](#) are excluded from consolidated billing:

- Physician's professional services;
- Certain dialysis-related services, including covered ambulance transportation to obtain the dialysis services;
- Certain ambulance services, including ambulance services that transport the beneficiary to the SNF initially, ambulance services that transport the beneficiary from the SNF at the end of the stay (other than in situations involving transfer to another SNF), and roundtrip ambulance services furnished during the stay that transport the beneficiary offsite temporarily in order to receive dialysis, or to receive certain types of intensive or emergency outpatient hospital services;
- Erythropoietin for certain dialysis patients;
- Certain chemotherapy drugs;
- Certain chemotherapy administration services;
- Radioisotope services; and
- Customized prosthetic devices.

For Medicare beneficiaries in a non-covered stay, only therapy services are subject to consolidated billing. All other covered SNF services for these beneficiaries can be separately billed to and paid by the Medicare contractor.

CMS provides a [specific listing of excluded services](#) by Health Care Common Procedure Codes (HCPCs) that providers can use to determine if a specific service is excluded. As in previous years, CMS specifically requested stakeholder input on excluding services that fall into the four specified categories (chemotherapy items, chemotherapy administration services, radioisotope services, and customized prosthetic devices) within which CMS has the authority to designate additional, individual services for exclusion. In the final rule, CMS reviewed several suggestions (including one by LeadingAge NY) but made no changes to the consolidated billing exclusions list.

## FY 2017 Wage Index

CMS has released the final wage indices for FY 2017, which will impact the SNF PPS rates effective Oct. 1, 2016 and the Home Health Agency (HHA) PPS rates effective Jan. 1, 2017. FY 2017 represents the second year of full implementation of [a revised delineation of the Core Based Statistical Areas \(CBSAs\)](#) used to determine the Medicare wage index in a geographic region.

Table 3 below lists all the counties in the state indicating whether their designation is urban or rural, provides the CBSA for each urban county and shows the corresponding FY 2017 wage index. The wage index is used as a multiplier against the labor portion of the base PPS rates to adjust for regional wage differences. You may also refer to the CMS Wage Index for FY 2016 web page by [clicking here](#).

**Table 3. New York State FY 2017 Wage Indices by County**

County Name	CBSA Name	Urban/ Rural	Wage Index
Albany County, New York	Albany-Schenectady-Troy, NY	Urban	0.8217
Allegany County, New York	New York (non-urban)	Rural	0.8408
Bronx County, New York	New York-Jersey City-White Plains, NY-NJ	Urban	1.2888
Broome County, New York	Binghamton, NY	Urban	0.8521

## Listings of Medicare SNF Part A Rates for FY 2017

Having determined the CBSA for your county, you may refer to the chart in Appendix A for the Medicare Part A rates for your facility by RUG IV group. If you would like to download the rate listing as an Excel™ file, please click [here](#).

Attached as Appendix B is a listing of the **Medicare Part A enhanced HIV/AIDS rates**, which are calculated by adding a 128 percent enhancement to the non-HIV rates.

- **SNF PPS Medicare Part A Rate Components for FY 2107**

For FY 2017 CMS ascribes **68.8 percent of the rate as labor-related and 31.2 percent as non-labor**. The following tables (Urban Table 4 and Rural Table 5) provide the breakdown of the FY 2017 rate components used to develop the final Medicare Part A rates that are listed in Appendices A and B:

**Table 4. Urban Rate Components** (Source: CMS SNF PPS FY 2017 Final Rule)

URBAN	Rate Component:	Nursing case-mix	Therapy case-mix	Therapy non-case-mix	Non-case-mix component
	Per Diem Amount:	\$175.28	\$132.03	\$17.39	\$89.46

**Table 5. Rural Rate Components** (Source: CMS SNF PPS FY 2017 Final Rule)

RURAL	Rate Component:	Nursing case-mix	Therapy case-mix	Therapy non-case-mix	Non-case-mix component
	Per Diem Amount:	\$167.45	\$152.24	\$18.58	\$91.11

## Conclusion

For questions on the SNF PPS rates, please contact Darius Kirstein by e-mail, [dkirstein@leadingageny.org](mailto:dkirstein@leadingageny.org), or call 518-867-8841. For questions on SNF value-based purchasing or quality reporting, please contact Dan Heim at [dheim@leadingageny.org](mailto:dheim@leadingageny.org) or call 518-867-8866.
