of Health

HOWARD A. ZUCKER, M.D., J.D.
Commissioner

LISA J. PINO, M.A., J.D.
Executive Deputy Commissioner

July 26, 2021

Dear Nursing Home Administrator:

The New York State Department of Health (NYSDOH) is finalizing the results of the 2020 Nursing Home Quality Initiative (NHQI) for public reporting and would like you to review the data submitted by your organization. This is not an opportunity to update your data, but to review your results and to reach out if you have any questions. This letter is accompanied by the methodology for the 2020 NHQI and instructions for interpreting your facility's 2020 NHQI results. We request that nursing homes provide feedback by **August 13, 2021**.

Your facility's report is posted to the Health Commerce System (HCS). To access this report, follow the instructions below.

1. Login to HCS: https://commerce.health.state.ny.us/public/hcs_login.html.
2. Enter User ID and Password.
3. From "My Applications", select "Healthcare Finance Data Gateway". Go to Step 4 if this application does not already exist in your list of applications, otherwise skip to Step 7.
4. From the top line menu under "My Content", choose "All Applications".
5. Select "H", then click the Green "+" button under the Add/Remove column to add the application to your personal "My Applications" list.
6. You may open the application from the page you are already on by clicking "Healthcare Financial Data Gateway" or you may choose it from "My Applications" under the Home page.
7. Go to the **Publications** section:
 - a. Under Collection, click on drop down and select "NH Rate Sheets"
 - b. Under Package, click on drop down and select "2020 Nursing Home Quality Initiative Results for Feedback"

- c. Under Organization, click on drop down and select your organization
- d. Click on Search

If there are any questions about the 2020 NHQI, please email us at nhqp@health.ny.gov. After the feedback period, the finalized results will be released to the nursing homes. The Department will also post finalized data on its Health Data NY website, and we will inform you when the file is publicly available.

Sincerely,

Raina Josberger
Deputy Director
Center for Applied Research and Evaluation
Office of Quality and Patient Safety

New York State Department of Health 2020 Nursing Home Quality Initiative Methodology

March 2021 updated

The 2020 Nursing Home Quality Initiative (NHQI) is comprised of three components: **[1]** the Quality Component (quality measures), **[2]** the Compliance Component (compliance with reporting), **[3]** and the Efficiency Component (potentially avoidable hospitalizations). The NHQI 2020 score is worth a maximum 90 points. The NHQI score is reduced from 100 points (previous NHQI) to 90 points (NHQI 2020) reflecting the removal of the two employee influenza vaccination measures (Percent of employees vaccinated for influenza and Timely submission of employee influenza vaccination data). These measures are removed from the NHQI 2020 due to the COVID-19 public health emergency.

Quality Component (65 points)

Quality measures are calculated from MDS 3.0 data, the CMS' Payroll Based Journal Public Use Files (PBJ PUFs) and the Nursing home compare data.

- The allotted 65 points for quality are distributed evenly for all quality measures. The NHQI includes 13 quality measures with each measure being worth a maximum of 5 points.
- The quintiles and results are based on the same measurement year. Therefore, only a certain number of nursing homes are able to achieve these quintiles for each measure. The results are not rounded until after determining the quintile for measures. For measures with very narrow ranges of performance, two facilities may be placed in different quintiles and receive different points, but after rounding, the facilities may have the same rate.
- For quality measures that are awarded points based on their quintile distribution, nursing homes will be rewarded for achieving high performance as well as improvement from previous year's performance. Note that improvement points will not apply to quality measures that are based on threshold values. See the Quality Point Grid for Attainment and Improvement below. Assuming each quality measure is worth 5 points, the distribution of points based on two years of performance is demonstrated in the grid.

Quality Point Grid for Attainment and Improvement

| | | Year 1 Performance | | | | |
|--------------------|----------|--------------------|---|---|---|---|
| | | Quintiles | 1 | 2 | 3 | 4 |
| Year 2 Performance | 1 (best) | 5 | 5 | 5 | 5 | 5 |
| | 2 | 3 | 3 | 4 | 4 | 4 |
| | 3 | 1 | 1 | 1 | 2 | 2 |
| | 4 | 0 | 0 | 0 | 0 | 1 |
| | 5 | 0 | 0 | 0 | 0 | 0 |

Year 1 = 2019 (2018 measurement year)

Year 2 = 2020 (2019 measurement year)

For example, if 2019 NHQI performance (Year 1) is in the third quintile, and 2020 NHQI performance (Year 2) is in the second quintile, the facility will receive 4 points for the measure. This is 3 points for attaining the second quintile and 1 point for improvement from the previous year's third quintile.

Table 1a. Quality Component – Measurement Period by Data Sources

| Data source | Measurement Period |
|--|---|
| MDS 3.0 | <ul style="list-style-type: none"> October 1, 2018 - June 30, 2019 (Percent of long stay residents who received the seasonal influenza vaccine) Calendar year 2019 (all other MDS based quality measures) |
| The CMS' Payroll Based Journal Public Use Files | Calendar year 2019 |
| The CMS' Nursing home compare data (Staffing file) | Calendar year 2019 |

Table 1b. Quality Component - Measures

| Number | Measure | Measure Steward | Data Source | Scoring Method | Notes | Eligible for Improvement in 2020 NHQI |
|--------|---|-----------------|---|----------------|---|---------------------------------------|
| 1 | Percent of contract/agency staff used | NYSDOH | The CMS' quarterly Payroll Based Journal Public Use Files for calendar year (PBJ Daily Nurse Staffing CY Q1, Q2, Q3, Q4) | Threshold | Maximum points are awarded if the rate is less than 10%, and zero points if the rate is 10% or greater. | No |
| 2 | Rate of staffing hours per resident per day | NYSDOH | Staffing file downloaded from the CMS' Nursing home compare data archive for calendar year. The staffing hours in the staffing file are reported through PBJ. | Quintile | | Yes |
| 3 | Percent of long stay high risk residents with pressure ulcers | CMS | MDS 3.0 | Quintile | Risk adjusted by the NYSDOH | Yes |
| 4 | Percent of long stay residents who received the pneumococcal vaccine* | CMS | MDS 3.0 | Quintile | | Yes |
| 5 | Percent of long stay residents who received the seasonal influenza vaccine* | CMS | MDS 3.0 | Quintile | | Yes |

* a higher rate is better

Table 1. Quality Component - Measures (continued)

| Number | Measure | Measure Steward | Data Source | Scoring Method | Notes | Eligible for Improvement in 2020 NHQI |
|--------|--|-----------------|-------------|----------------|--|---------------------------------------|
| 6 | Percent of long stay residents experiencing one or more falls with major injury | CMS | MDS 3.0 | Threshold | Maximum points are awarded if the rate is equal to or less than 5%, and zero points if the rate is greater than 5%. | No (Scoring method change) |
| 7 | Percent of long stay residents who have depressive symptoms | CMS | MDS 3.0 | Quintile | | Yes |
| 8 | Percent of long stay low risk residents who lose control of their bowel or bladder | CMS | MDS 3.0 | Quintile | | Yes |
| 9 | Percent of long stay residents who lose too much weight | CMS | MDS 3.0 | Quintile | Risk adjusted by the NYSDOH | Yes |
| 10 | Percent of long stay residents with dementia who received an antipsychotic medication | PQA | MDS 3.0 | Quintile | | Yes |
| 11 | Percent of long stay residents who self-report moderate to severe pain | CMS | MDS 3.0 | Threshold | Risk adjusted by the NYSDOH. Maximum points are awarded if the rate is equal to or less than 5%, and zero points if the rate is greater than 5%. | No (Scoring method change) |
| 12 | Percent of long stay residents whose need for help with daily activities has increased | CMS | MDS 3.0 | Quintile | | Yes |
| 13 | Percent of long stay residents with a urinary tract infection | CMS | MDS 3.0 | Threshold | Maximum points are awarded if the rate is equal to or less than 5%, and zero points if the rate is greater than 5%. | No (Scoring method change) |

* a higher rate is better

Compliance Component (15 points)

The compliance component consists of **two** measures: CMS' five-star quality rating for health inspections and timely submission of nursing home certified cost reports.

- CMS Five-Star Quality Rating for Health Inspections (regionally adjusted)
 - The **health inspection survey scores** will be downloaded from CMS. These scores will be used to calculate cut points for each region in the state. Regions include the Metropolitan Area, Western New York, Capital District, and Central New York. Per CMS' methodology, the top 10% of nursing homes will receive five stars, the middle 70% will receive four, three, or two stars, and the bottom 20% will receive one star. Each nursing home will be awarded a Five-Star Quality Rating based on the cut points calculated from the health inspection survey scores within its region. **Ten** points are awarded for obtaining five stars or the top 10 percent (lowest 10 percent in terms of health inspection deficiency score). **Seven** points for obtaining four stars, **four** points for obtaining three stars, **two** points for obtaining two stars, and **zero** points for one star.
- Timely submission measures
 - Submission of certified and complete nursing home cost reports to the NYSDOH by the deadlines as specified by the Bureau of Residential Health Care Reimbursement, Division of Finance and Rate Setting, is worth five points.

Table 2. Compliance Component Measures

| Number | Measure | Measure Steward | Data Source and Measurement Period | Scoring Method |
|--------|---|-----------------|---|--|
| 1 | CMS Five-Star Quality Rating for Health Inspections (regionally adjusted) | CMS | CMS health inspection survey scores (as of April 2020) | 5 stars=10 points 4 stars=7 points 3 stars=4 points 2 stars=2 points 1 star=0 points |
| 2 | Timely submission of certified and complete nursing home cost reports | NYSDOH | Nursing home cost report, 2019 calendar year for calendar filers and 2019 fiscal year for fiscal filers | Five points for timely submission of the certified and complete cost report |

Efficiency Component (10 points)

- To align with the other CMS quality measures, the Potentially Avoidable Hospitalizations rate will be calculated for each quarter, then averaged to create an annual average.
- The PAH measure is risk-adjusted.

Table 3. Efficiency Component Measures

| Number | Measure | Measure Steward | Data Source and Measurement Period | Scoring Method |
|--------|--|-----------------|--|--|
| 1 | Potentially Avoidable Hospitalizations | NYSDOH | MDS 3.0 and SPARCS, 2019 calendar year | Quintile 1=10 points Quintile 2=8 points Quintile 3=6 points Quintile 4=2 points Quintile 5=0 points |

Scoring

The facility's overall score will be calculated by summing the points for each measure in the NHQI. In the event that a measure cannot be used due to small sample size or unavailable data, the maximum attainable points will be reduced for that facility. For example, if a facility has a small sample size on two of its quality measures (each 5 points), the maximum attainable points will be 80 rather than 90. The sum of its points will be divided by 80 to calculate its total score. The example below provides a mathematical illustration of this method.

Table 4. Calculating the overall score without and with small sample size

| | Facility A | Facility B |
|------------------------------|----------------------|---|
| | no small sample size | small sample size on two quality measures |
| Sum of points | 70 | 70 |
| Maximum points attainable | 90 | 80 |
| Score ratio (points/maximum) | 0.78 | 0.88 |
| Final score | 78 | 88 |

Ineligibility for NHQI Ranking

Due to the severity of letter J, K, and L health inspection deficiencies, receipt of a deficiency is incorporated into the NHQI. Nursing homes that receive one or more of these deficiencies are not eligible to be ranked into overall quintiles. J, K, and L deficiencies indicate a Level 4 immediate jeopardy, which is the highest level of severity for deficiencies on a health inspection. Immediate jeopardy indicates that the deficiency resulted in noncompliance and immediate action was necessary, and the event caused or was likely to cause serious injury, harm, impairment, or death to the resident(s).

- Deficiency data shows a J/K/L deficiency between July 1 of the measurement year (2019) and June 30 of the reporting year (2020).
- Deficiencies will be assessed on October 1 of the reporting year to allow a three-month window for potential Informal Dispute Resolutions (IDR) to process.
- Any **new** J/K/L deficiencies between July 1 and September 30 of the reporting year (2020) will **not** be included in the current NHQI; they will be included in the next NHQI cycle.
- If a JKL citation is found to be expunged or lowered based upon an IDR panel review, the Department reserves the right to make the adjustments.

Nursing Home Exclusions from NHQI

The following types of facilities will be excluded from the NHQI and will not contribute to the pool or be eligible for payment:

- Non-Medicaid facilities
- Any facility designated by CMS as a Special Focus Facility at any time during 2019 or 2020, prior to the final calculation of the NHQI
- Specialty facilities
- Specialty units within a nursing home (i.e. AIDS, pediatric specialty, traumatic brain injury, ventilator dependent, behavioral intervention, neurodegenerative units)
- Continuing Care Retirement Communities
- Transitional Care Units

For more information about the NHQI methodology, please contact the Office of Quality and Patient Safety at NHQP@health.ny.gov.

Measure specifications for the CMS Quality Measures used in the NHQI can be found in the MDS 3.0 Quality Measures User's Manual, Version 12.1, at <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/NursingHomeQualityInits/Downloads/MDS-30-QM-USERS-MANUAL-v121.pdf>.

Measure specifications for the Pharmacy Quality Alliance's percent of long stay residents with dementia who received an antipsychotic medication measure can be found at http://www.qualityforum.org/Measures_Reports_Tools.aspx.

New York State Department of Health

2020 Nursing Home Quality Initiative

Interpreting the Facility's Report

The facility-level report is comprised of five areas: **[1]** quality component, **[2]** compliance component, **[3]** efficiency component, **[4]** scoring, and **[5]** determination of ineligibility. The NHQI 2020 score is worth a maximum of 90 points. The NHQI score is reduced from 100 points (previous NHQIs) to 90 points (NHQI 2020) reflecting the removal of the two employee influenza vaccination measures (Percent of employees vaccinated for influenza and Timely submission of employee influenza vaccination data). These measures are removed from the NHQI 2020 due to the COVID-19 public health emergency.

1. Quality Component (65 points)

The quality component contains 13 quality measures worth a combined maximum of 65 points. Each measure is weighted equally. The quality component consists of the MDS 3.0 quality measures (using four quarters of 2019), the staffing measures (the percent of contract/agency staff used and the rate of staffing hours per resident per day from CMS's payroll based journal data (PBJ) and Nursing home compare staffing data)

MDS 3.0 quality measures

- The 'Value' column shows the rates of each MDS 3.0 quality measure. A value of 'SS' (small sample) indicates that the denominator for the measure was less than 30 and thus the sample was too small to create a meaningful rate. This did not result in a loss of points. In cases of a small sample size, the maximum points that the facility could obtain were reduced from the base and its final score divided by the maximum points available.
 - For example, if a facility has a small sample size on two of its quality measures (each worth five points), the maximum attainable points will be 80 rather than 90. The sum of its points will be divided by 80 to calculate its total score.
- The 'Quintile' column shows the quintile for which the facility qualified based on the distribution of values from all facilities in the Nursing Home Quality Initiative (NHQI). Quintile one is the top quintile, while five is the bottom.
 - Four quality measures were not separated into quintiles and will show 'NA' (not applicable) for their quintile assignment: These quality measures are assigned all or no points based on threshold values.
 - For the percent of contract/agency staff used measure, five points are awarded if the rate is less than 10%, and zero points if the rate is 10% or greater.
 - For the percent of long stay residents experiencing one or more falls with major injury, five points are awarded if the rate is equal to or less than 5%, and zero points if the rate is greater than 5%.
 - For the Percent of long stay residents who self-report moderate to severe pain, five points are awarded if the rate is equal to or less than 5%, and zero points if the rate is greater than 5%.
 - For the percent of long stay residents with a urinary tract infection, five points are awarded if the rate is equal to or less than 5%, and zero points if the rate is greater than 5%.
- The 'Points' column shows the number of points awarded to the facility based on its performance in the measure.

Staffing measures

- Rate of staffing hours per resident per day
 - The 'Value' column shows the rate of staffing hours per resident per day, as calculated using 2019 Q1 – Q4 of CMS' nursing home compare staffing data.
 - A value of 'DNA' (data not available) indicates that the facility did not have at least three quarters of staffing information or the facility may not have staffing information due to the exclusion criteria set by CMS. In these cases, the facility received zero points and the base was not reduced.
 - The 'Quintile' column shows the quintile for which the facility qualified based on the distribution of values from all facilities in the NHQI. Quintile one is the top quintile, while five is the bottom.
 - The 'Points' column shows the number of points awarded to the facility based on its performance in the measure.

- Percent of contract/agency staff used
 - The 'Value' column shows the percent of contract/agency staff used, as calculated using 2019 Q1 – Q4 of CMS' PBJ daily nurse staffing files.
 - A value of 'DNA' (data not available) indicates that the facility did not have at least three quarters of staffing information or the facility may not have staffing information due to the exclusion criteria set by CMS. In these cases, the facility received zero points and the base was not reduced.
 - This measure does not require a quintile ranking and will indicate 'NA'.
 - The 'Points' column shows the number of points awarded. Five points were awarded for a percent of contract/agency staff used of less than 10%. Zero points were awarded for 10% or higher.

2. Compliance Component (15 points)

The compliance component contains two measures worth a combined maximum of 15 points. The NYS regionally adjusted five-star health inspection rating as of April 1, 2020 is worth ten points and is adjusted for regional variation by NYS. The timely submission of 2019 nursing home certified cost reports is worth five points.

NYS regionally-adjusted five-star quality rating for health inspections

- The 'Value' column shows the number of stars awarded by the five-star rating. A value of 'NA' indicates that health inspection score data from CMS was not available, or the facility was too new to rate. In this case, the facility was not penalized, and the base was reduced.
- This measure does not require a quintile ranking and will indicate 'NA'.
- The 'Points' column shows the number of points awarded to the facility based on its five-star rating.
- Ten points are awarded for obtaining five stars or the top 10 percent (lowest 10 percent in terms of health inspection deficiency score). Seven points are awarded for four stars, four points for three stars, two point for two stars, and zero points for one star.

Timely submission of nursing home certified cost reports

- The 'Value' column indicates whether or not the facility submitted the data by the designated deadline. Deadline is specified by the Bureau of Long-Term Care Reimbursement, Division of

Finance and Rate Settings. Five points are awarded if the value is 'Yes', and zero points if the value is 'No'.

- These measures do not require quintile rankings and will indicate 'NA'.
- The 'Points' column shows the number of points awarded to the facility.

3. Efficiency Component (10 points)

The efficiency component includes the potentially avoidable hospitalizations measure. This measure is based on all four quarters of 2019 and is worth 10 points. It indicates the number of potentially avoidable hospitalizations per 10,000 long stay days.

- The 'Value' column shows the number of potentially avoidable hospitalizations per 10,000 long stay days.
- The 'Quintile' column shows the quintile for which the facility qualified based on the distribution of values from all facilities in the NHQI.
- The 'Points' column shows the number of points awarded to the facility based on its quintile.
- 10 points are awarded for obtaining the first quintile, eight points for the second quintile, six points for the third quintile, two points for the fourth quintile, and zero points for the fifth quintile.

4. Scoring

The scoring component contains the overall score and the quintile ranking. The NHQI 2020 score is worth a maximum of 90 points.

Overall Score per Base Points

| The 'Points' column shows the sum of the points earned for each measure, divided by the total base of points for the facility, multiplied by 100. This method is shown in the examples below. | Facility A No small sample size (no reduction of base points) | Facility B Small sample size on two quality measures, each worth 5 points (10-point reduction of base points) |
|---|--|--|
| Sum of points | 70 | 70 |
| Maximum base points for the facility | 90 | 80 |
| Score (points/maximum) | .777 | .875 |
| Score x 100 | 77.8% | 87.5% |

Quintile ranking

- The 'Quintile' column shows the quintile for which the facility qualified based on the distribution of scores from all facilities in the NHQI. The first quintile is the top rank, while the fifth quintile is the bottom. In the NHQI results for feedback document, the quintile ranking is suppressed and displayed as "Blank". In the NHQ final results document, the quintile ranking is displayed.

5. Determination of Ineligibility

The determination of ineligibility section indicates that a facility had a level J, K, or L deficiency between July 1 of the measurement year (2019) and June 30 of the reporting year (2020), making it ineligible for potential payment. The overall score per base points and quintile ranking are displayed for these facilities to show where they would have placed in the rankings had they had not received a level J, K, or L deficiency.
