

Personal Protective Equipment and Medical Supply Companies

We know that many health care providers struggled with procuring personal protective equipment (PPE) and other medical supplies during the emergence of COVID-19.

The PPE supply chain remains strained but is improving daily. Many items may still be unavailable or on long back orders. We have assembled the information below to assist providers in locating PPE as the supply chain recovers from the severe shortages of the last few months.

This list is neither exclusive nor exhaustive. The NYC Health Department is providing this information to assist New Yorkers locate services and for general information but does not make any representation or warranty concerning the quality or accuracy of the services provided by these identified establishments.

If you are a member of the Medical Society of the State of New York (MSSNY) you may be able to take advantage of their program to increase access to PPE for their members. Visit mssny.org and look for the box on the right side of the page titled "Members: Access Your PPE Here."

Unfortunately, the NYC Health Department is only able to support limited requests for PPE at this time and has focused its efforts on ensuring PPE for those in acute care and congregate care settings with very few and very targeted exceptions. Thank you for understanding. We hope that this information assists you.

The NYC Health Department may change recommendations as the situation evolves.
