BHO/HARP	Initiating Rate Discussions with CMS; Meeting to be scheduled with Assoc. to discuss remaining Open Issues

# Additional Rate Investments

- ❑ Inpatient adjustment brought initial Mercer inpatient trend assumptions down to reflect current costs based on final 7/1/14 Inpatient Fee Schedule.
- ❑ Pharmacy Premium Enhancement – \$32M will be added to the rate effective 7/1. This will be in addition to the \$75M already in the July package.
- ❑ Non-Qualifying Quality Incentive (QI) Plans – Additional funds will be available for those plans who have made improvements but still do not qualify for the MMC QI. In order to qualify, plans must develop a plan to:
  - ❑ Engage in Payment Reform;
  - ❑ Explore Value Based Payment arrangements (e.g. upside/downside risk, global payments, sub-capitation, etc.); and
  - ❑ Control high utilization/high volume services.
