Redesign Medicaid in New York State

Implementing Medicaid Behavioral Health Managed Care in New York: Summary of RFQ Concerns

Managed Care Policy and Planning Meeting

July 17, 2014

RFQ Evaluation Update Agenda

- Review of high level themes/issues/concerns from RFQ application submissions

System Transformation

- ❑ Limited attention to transformational vision of NYS
 - ❑ Majority of responses lacked recovery-oriented and person-centered approach
 - ❑ Specifically in the areas of clinical management, utilization management, and member services
 - ❑ Limited discussion of employment and education services
 - ❑ Limited discussion as to why people fail in care and how Plans can affect this
 - ❑ Inadequate focus on the unique needs of people with SUD conditions
 - ❑ Limited detail on addressing the needs of the SMI/SUD population within the context of BH/PH integration
 - ❑ Inadequate discussion on the need to ensure cross system care coordination
 - ❑ Discussion of cultural competency in network development and member services was minimal and insufficient
 - ❑ Plan's projected budgets did not evidence transformational vision
 - ❑ i.e., replacement of BH inpatient with ambulatory services

Supporting BH Integration in Current Plan Operations

- ❑ Plans varied in ability to describe how operations will be augmented to better support BH integration
 - ❑ Staffing
 - ❑ Training
 - ❑ Computer systems (Claims/encounters/reporting)
 - ❑ Quality Assurance
 - ❑ Pharmacy management and monitoring
- ❑ The process for 24/7 crisis response and after hour service coverage was frequently not clear

Lack of Clarity Around Delegation Agreements

- ❑ Several Plans did not clearly articulate the roles and responsibilities of the Plan and the delegated BH management entity including:
 - ❑ Staffing for key positions
 - ❑ How information would be shared
 - ❑ How UM decision would be made
 - ❑ How oversight would occur
 - ❑ How BH/PH integration would be fostered
 - ❑ How after-hours and crisis calls would be managed
- ❑ Not all Plans identified all their vendors, making it difficult to understand who will be responsible for meeting the requirements of the RFQ

Staffing Structure

- ❑ Inconsistencies across Plan supplied staffing tables making it difficult to evaluate if staffing is adequate.
 - ❑ NYS will distribute a staffing data collection tool to Plan applicants
- ❑ Wide variation in staffing allocation per member between Plans (including mainstream Plans and HARPs)
- ❑ Most Plan proposals for orienting and training staff lacks sufficient detail
- ❑ Unclear how Plans will use performance measures and quality outcomes to adjust staffing
 - ❑ Many Plans said they would adjust staffing based on a staffing model (not shared) and complaints about access

Next Steps

- ❑ Review RFQ recommendations with OMH, OASAS, and DOH Commissioners
- ❑ Commissioners make initial designations
- ❑ State notifies Plans of preliminary designation status and required follow up
- ❑ State meets with Plans in person
- ❑ State notifies Plans of assigned State liaison
- ❑ Conduct Readiness Reviews
