

Sub Committee	Objectives	Deliverables	Skills and Experience Desired
Technical Design	Support the State in further developing the different types of VBP arrangements and adding detail (or suggesting to leave to negotiating parties) on the topics of attribution, interaction between VBP arrangements, shared savings/risk percentages, stop-loss arrangements, cost of care calculations and predictions, etc. The design of the Innovator Program is included here as well. Support other subcommittees as needed.	VBP Design Recommendations Report	Fundamental understanding of the DSRIP Program and transformation in NYS health delivery system Deep knowledge of Medicaid and its payment processes Experience with varying levels of risk based arrangements
Regulatory Impact	Assess current regulatory landscape as it relates to VBP Identify and classify key regulatory issues associated with VBP Arrangements and formulate ways to address potential obstacles and risks. This should include an analysis of potentially superfluous regulations when moving towards VBP	VBP Regulatory Recommendations Report	Knowledge of laws and regulations related to Medicaid FFS and VB Payment models Legal/Regulatory Expertise Experience in contracting with health plans
Social Determinants of Health	Ensure the inclusion of social determinants of health in the VBP payment mechanisms and outcome measures Explore options to enhance the current strategy of addressing social determinants through VBP design	Recommendation on outcome measures and reporting requirements for social determinants	Expertise in cultural competence, social determinants such as housing, education, employment, substance abuse, health literacy, economic environment, etc. Expertise in the data needs from reporting perspective
Community Based Organizations	Identify the ways in which CBOs can participate in the VBP Transition Develop plan for identifying and providing technical assistance to CBOs in the transition towards VBP	Recommended action plan for CBO assistance and training	Knowledge of CBO services provided to Medicaid patients Experience related to technical assistance and CBO needs
Communications	Ensuring effective communication and collaboration among all parties participating in VBP	Communication strategy that adequately addresses the complexities of the VBP implementation and stakeholder participation	Program/project management Organizational change management knowledge Facilitation / Moderation Skills Communication Training

<p>Integrated Care Services</p>	<p>Fully validate and define the (sub)populations and patient categories and the included care services for each of the VBP arrangements Identify outcome measures Identify issues in establishing cost of care per VBP arrangement Identify challenges to implementation</p>	<p>Definition and method of cost calculation of each VBP arrangement identified Aligned outcome measures</p>	<p>Health care professionals Clinical scientists/epidemiologists/care outcomes experts Financial knowledge <i>All related to the specific (sub)population or patient</i></p>
