 - Ensure the resident can return home
 - Provide meaningful activities for the resident
 - Help the resident improve his/her level of functioning
 - Provide assistance with activities of daily living (ADL's)
- A resident who is usually alert and oriented, is having difficulty remembering where he is today. What should the nurse aide do first?
 - Increase the resident's fluids since dehydration causes confusion
 - Consider that some memory loss is a normal part of aging
 - Ask where the resident believes he is
 - Report the change to the charge nurse
- A charge nurse asks a nurse aide to perform a task that is not part of the nurse aide's scope of practice. What should the nurse aide do?
 - Consider if the task can be performed another way
 - Provide the care and perform the task as best as possible
 - Contact the ombudsman's office since resident's rights may be violated
 - Refuse to perform the task and explain that it is not within the nurse aide's role
- A resident has a contracture of the right arm. When putting on the resident's button-front shirt, the nurse aide should
 - Put the shirt sleeve on the left arm first and then the right arm
 - Ask which arm the resident prefers the sleeve to go on first
 - Put the shirt sleeve on the right arm first and then the left arm
 - Raise resident's arms up to slide both sleeves on at the same time
- If a resident is lying in bed vomiting, why does the nurse aide need to help the resident to turn on the resident's side quickly?
 - To get the resident into a more comfortable position
 - To get towels placed to protect the linen
 - To keep the vomit off the resident's face
 - To help prevent aspiration
- When a resident wears a restraint, the nurse aide must make sure the
 - Resident is wearing an incontinent brief
 - Resident is checked once every two hours
 - Restraint is applied following the manufacturer's instruction
 - Restraint is applied tightly and placed under the resident's clothing

From prometric test questions 4/10/20 test bank of 150 LMR/lmr

Name: _____ Date _____

8. When going to take routine vital signs, the nurse aide discovers that a minister is praying with the resident. The nurse aide should
- (A) Ask how long the minister plans to visit
 - (B) Explain politely that it is time to take vital signs
 - (C) Check if the resident is praying before interrupting
 - (D) Wait to take the vital signs until after the minister has left
9. A nurse aide hears the charge nurse scream at a resident. The nurse aide goes to the resident to provide immediate protection of the resident. The nurse aide should also
- (A) Call the police immediately
 - (B) Ask if the nurse is feeling stressed about something
 - (C) Report the situation to the charge nurse's supervisor
 - (D) Ask if any other staff have observed this behavior
10. A nurse aide is walking a resident using a gait belt. The resident tells the nurse aide she feels dizzy. The nurse aide should
- (A) hold the gait belt tighter and ask the resident to rest for a minute
 - (B) suggest the resident lean on the nurse aide for more support
 - (C) guide the resident over to the handrail and ask to hold
 - (D) ease the resident to the floor if a chair is not available
