

## Enviral Tech Zone Surface Check Kit Dual pathogen: COVID and influenza

### Year-round protection against communicable diseases

Detecting the presence of pathogens early in senior and skilled nursing communities can prevent outbreaks and save lives. The presence of pathogens on surfaces is one of the earliest signs of communicable diseases within a community. Enviral Tech's Zone Kit for Surface Testing detects those pathogens with the swipe of a swab and provides infection surveillance year-round.

The COVID and influenza Zone Surface Check Kit detects both pathogens on high-traffic surfaces to detect the presence of infectious individuals in the community up to 5 days earlier than other methods can. With rigorous infection control expected within senior and nursing communities, confidence in proper infection control protocols is paramount.

### This is a subscription for weekly surveillance testing

- Every week, we send you one kit per zone to be tested
- Swab 8 surfaces inside each zone
- Ship the swab to our lab overnight (postage-paid label included)
- We look for both pathogens in your set of swabs
- We provide you with a simple report within 24 hours of receiving your swabs: 1 zone, 8 surfaces, 1 result

### What is a zone?

A zone is a set of 8 high-traffic surfaces in your building that are accessed by a limited and traceable group of people. Our research shows that 8 is the optimal number of surfaces to test to detect an outbreak in senior and long-term care.

## What are your benefits?

- Minimize outbreaks and alleviate testing fatigue for residents and staff via non-invasive testing
- Validate your infection control procedures
- Regain the trust of the public and increase census by publishing the certificate of testing to highlight your commitment to high quality standard of safety
- Make rapid decisions confidently based on the simple weekly report

## What is included?

- 8 swabs with collection tubes, gloves, disinfecting wipe, simple instructions and a postage-paid overnight shipping label
- A clear weekly report within 24 hours that tell you if your zone has been exposed to COVID-19 and/or influenza
- Rapid, responsive and personalized support via phone or email, 7 days a week

## Pricing

Product	Cost per zone	Onboarding fee
Zone Surface Check Kit, dual pathogen: COVID and influenza	\$500.00 / month	\$1,000.00 (waived through 1/31/21)
