

CLEAN SMARTER TO KEEP YOUR COMMUNITY SAFER

Our PREVENTIVE DISINFECTION service is a proactive approach to keeping your community safe in these unprecedented times of COVID-19. Regulation infection prevention and disinfection procedures are essential to reduce exposure risk for your residents, staff, and their families.

SCIENCE-BASED, COMPREHENSIVE DISINFECTION

Preventive disinfection is a science. That's why we use a precise methodology:

EVALUATE
the unique risks of
your community
environment.

IDENTIFY
best-suited advanced
preventive disinfection
practices and products.

DELIVER
a custom, comprehensive
program to protect your
residents and staff.

**HOSPITAL-GRADE
DISINFECTANTS**
to control infection

**PROPRIETARY
7-STEP CLEANING
PROCEDURE**

**PREVENT
TRANSMISSION**
proper PPE reduces
exposure risks

**PULSED UV
TECHNOLOGY**
reliably reduces enveloped
coronaviruses such as SARS-CoV
and MERS-CoV on surfaces

THREE CORE COMPONENTS. ONE POWERFUL PROGRAM.

Our comprehensive Preventive Disinfection Service is built on three core components: Prevention, Disinfection, and Pulsed UV (PX-UVC) Technology. Together, they deliver a powerfully effective clean and superior results across your operations.

PREVENTION

- According to the CDC, 1 to 3 million serious infections occur in long-term care environments each year
- Infection Prevention protocols rooted in microbiology reduce acquired infections by up to 50%
- Personal protective equipment and training, to prevent transmission between employees and residents

DISINFECTION

- Adheres to Infection Prevention and Control guidance from the CDC (Center for Disease Control)
- Utilizes EPA-registered, hospital-grade disinfectants appropriate for use against SARS-CoV-2, the cause of COVID-19
- Our standard operating procedures and infection prevention controls should reduce the risks of COVID-19

PULSED UV (PX-UVC) TECHNOLOGY

- Pulsed Broad-Wavelength with Ultraviolet C (UVC) disinfection technology proven to eliminate pathogens in seconds
- PX-UV is proven to make an appreciable reduction in bacterial pathogen such as MRSA or spore-forming C.Diff
